                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          CC Blymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the CC tumour necrosis factor (TWF) super family and induces B cell CC proliferation and differentiation. The antibodies of the invention have CC cytostatic, immunosuppressive, immunostimulant, immunomodulatory, CC antirheumatic and antiAlDS activity of BLyS. The antibodies bind to BLyS complete the expression and activity of BLyS. The antibodies bind to BLyS complete the expression and activity of BLyS. The antibodies bind to BLyS complete and may be used in this way to diagnose disease CC associated with aberrant expression of BLyS. They may also be complete to treat diseases associated with aberrant BLyS expression CC administered to treat diseases associated with aberrant BLyS expression CC and activity such as cancer, immune, and autoimmune disorders and CC diseases, e.g. systemic lupus crythematosus, rheumatoid arthritis, CC immunodeficiency (cycl) and CC complete immunodeficiency (cycl) and CC acquired immunodeficiency syndrome (AIDS)). ABP4399-ABP4728 represent CC immunodeficiency syndrome (AIDS)). ABP4399-ABP4728 represent CC immunodeficiency syndrome (AIDS)).

This invention describes novel antibodies that immunospecifically bind to B Lymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the CC tumour necrosis factor (TNF) super family and induces B cell cumour necrosis factor (TNF) super family and induces B cell correct of the invention and differentiation. The antibodies of the invention have cytostatic, immunosuppressive, immunostimulant, immunomodulatory, antirheumatic and antiAlDS activity and can be used in vaccines to inhibit the expression and activity of BLyS. The antibodies bind to BLyS in biological samples and may be used in this way to diagnose disease associated with aberrant expression of BLyS. They may also be administered to treat diseases associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and condesiciency (e.g. common variable immunodeficiency (CVID) and capuired immunodeficiency syndrome (AIDS)). ABP43990-ABP47228 represent the antibodies and fragments of the antibodies described in the method con the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Claim 1; Page 2079-2080; 3148pp; English.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ន្តន្តន្ត
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Matches 101;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Query Match
This invention describes novel antibodies that immunospecifically bind to B Lymphcyte Stimulator (BLyS) polypeptides. BLyS is a member of the tumour necrosis factor (TNF) super family and induces B cell proliferation and differentiation. The antibodies of the invention have cyrostatic, immunosuppressive, immunostimulant, immunomodulatory, antirheumatic and antiADDS activity and can be used in vaccines to inhibit the expression and activity of BLyS. The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       16-MAR-2001;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ś
                                                                                                                                               B Lymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the tumour necrosis factor (TNF) super family and induces B cell proliferation and differentiation. The antibodies of the invention have antirheumatic and antiALDS activity and can be used in vaccines to inhibit the expression and activity and can be used in vaccines to and so may be used to detect and quantitate the presence of BLyS in associated with aberrant expression of BLyS. The antibodies bind to BLyS in associated with aberrant expression of BLyS. They are disease administered to treat diseases associated with aberrant BLyS expression diseases, e.g. systemic lumins ervitages, and autoimmune disorders and diseases, e.g. systemic lumins ervitages.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Matches
                                                                           B Lymphocyte Stimulator (BLyS) polypoptides. BlyS is a member of the tumour necrosis factor (TNF) super family and induces B cell proliferation and differentiation. The antibodies of the invention have cytostatic, immunosuppressive, immunostimulant, immunomodulatory, antirheumatic and antiAIDS activity and can be used in vaccines to inhibit the expression and activity of BLyS. The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in associated with aberrant expression of BLyS. The antisquese disease administered to treat disease associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and alloys expression diseases.
                           diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, immunodeficiency (e.g. common variable immunodeficiency (CVID) and
                                                                                                                                                                                                                                                                                                                                                                            This invention describes novel antibodies that B Lymphocyte Stimulator (BLyS) polypeptides. This invention describes novel antibodies that immunospecifically bind to CC Brymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the CC tumour necrosis factor (TNF) super family and induces B cell crown for the control of the control of the control of the invention have control of the invention and differentiation. The antibodies of the invention have control of the invention and antihads activity of BLyS. The antibodies bind to BLyS in the expression and activity of BLyS. The antibodies bind to BLyS in control of the superior of BLyS in this way to diagnose disease the bind to blys control of the second of BLyS. They may also be control of the such as cancer, immune, and autoimmune disorders and activity such as cancer, immune, and autoimmune disorders and control of the such as cancer, immune, and autoimmune disorders and control of the such as cancer, immune, and autoimmune disorders and control of the such as cancer, immune, and autoimmune disorders and control of the such as cancer, immune, and autoimmune disorders and control of the such as cancer, immune, and autoimmune disorders and control of the antibodies and fragments of the antibodies described in the method control of the antibodies and fragments of the antibodies described in the method control of the antibodies and fragments of the antibodies described in the method control of the antibodies and fragments of the antibodies control of the antibodies contro

This invention describes novel antibodies that immunospecifically bind to CB Lymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the CC tumour necrosis factor (TNP) super family and induces B cell CC proliferation and differentiation. The antibodies of the invention have CC cytostatic, immunosuppressive, immunostimulant, immunomodulatory, CC antirheumatic and antiALDS activity and can be used in vaccines to cinhibit the expression and activity of BLyS. The antibodies bind to BLyS in CC and so may be used to detect and quantitate the presence of BLyS in CC alsociated with aberrant expression of BLyS. They may also be associated with aberrant expression of BLyS. They may also be cand activity such as cancer, immune, and autoimmune disorders and CC diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, CC immunodeficiency (e.g. common variable immunodeficiency (CVID) and acquired immunodeficiency syndrome (AIDS)). ABP43990-ABP47228 represent che antibodies and fragments of the antibodies described in the method of the antibodies and invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       RESULT 10

                                                                                                                                                                                                                                                                                                                                          δ
                                                                                                                                                                                                                                                                                                                                                                                                                                                 EC BLymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the Ct tumour necrosis factor (TNF) super family and induces B cell proliferation and differentiation. The antibodies of the invention have C cytostatic, immunosuppressive, immunostimulant, immunomodulatory, CC inhibit the expression and activity and can be used in vaccines to C and so may be used to detect and quantitate the presence of BLyS in CC associated with aberrant expression of BLyS. They may also be CC associated with aberrant expression of BLyS. They may also be CC administered to treat diseases associated with aberrant BLyS expression of CC diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, acquired immunodeficiency (e.g. common variable immunodeficiency (CVID) and CC acquired immunodeficiency syndrome (AIDS)). ABP47328 represent CC of the invention
                                                                                                                                                                                                                                                                                                                                                                       Query Match

BLyS is a member of the CC tumour necrosis factor (TNP) super family and induces B cell proliferation and differentiation. The antibodies of the invention have CC cytostatic, immunosuppressive, immunostimulant, immunomodulatory, CC antirheumatic and antiAlDS activity and can be used in vaccines to cinhibit the expression and activity of BLyS. The antibodies bind to BLyS cand so may be used to detect and quantitate the presence of BLyS in CC and so may be used to detect and quantitate the presence of BLyS in CC associated with aberrant expression of BLyS. They may also be CC administered to treat disease associated with aberrant BLyS expression CC diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, CC immunodeficiency (e.g. common variable immunodeficiency (CUD) and CC immunodeficiency (e.g. common variable immunodeficiency (CUD) and CC acquired immunodeficiency syndrome (AIDS)). ABP43990-ABP4728 represent CC of the invention

The antibodies of the invention have cytostatic, immunosuppressive, immunostimulant, immunomodulatory, cantirheumatic and antiAIDS activity and can be used in vaccines to inhibit the expression and activity of BLyS. The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in biological samples and may be used in this way to diagnose disease cascoiated with aberrant expression of BLyS. They may also be associated with aberrant expression of BLyS. They may also be cadministered to treat diseases associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and ciseases, e.g. systemic lupus crythematosus, rheumatoid arthritis, common variable immunodeficiency (c.g. common variable immunodeficiency (CVID) and acquired immunodeficiency syndrome (AIDS)). ABP47920-ABP47228 represent confirmation and fragments of the antibodies described in the method

The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in biological samples and may be used in this way to diagnose disease associated with aberrant expression of BLyS. They may also be administered to treat diseases associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, immunodeficiency (e.g. common variable immunodeficiency (CVID) and acquired immunodeficiency (spotomome (AIDS)). ABP43990-ABP47228 represent the antibodies and fragments of the antibodies described in the method

The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in biological samples and may be used in this way to diagnose disease associated with aberrant expression of BLyS. They may also be administered to treat diseases associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, immunodeficiency (e.g. common variable immunodeficiency (CVID) and acquired immunodeficiency syndrome (AIDS)). ABP43990-ABP47228 represent the antibodies and fragments of the antibodies described in the method
                                                                                                                                                                                                                                                                                                                                                                                                                                                                       15-JUN-2001; 2001WO-US19110
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     10-JAN-2002

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        吊
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                CC This invention describes novel antibodies that immunospecifically bind to CC B Lymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the CC tumour necrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and induces B cell color recrosis factor (TNF) super family and can be used in vaccines to color family super family and can be used in vaccines to color family super family super
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Matches

This invention describes a novel polynucleotide (I) (and complement, hybridizable polynucleotides) comprising a contiguous nucleotide secoding for a human antibody with factor VIII specificity which has hemostatic activity. (I) is useful a primer or probe for detecting presence of inhibitory antibodies directed against factor VIII. The
                                                                                                                                                                                              New polynucleotide, polypeptide and antibody useful for diagnosing presence of neutralizing antibodies against factor VIII and for treatment of hemophilia A patients with these antibodies -

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              This invention describes a novel polynucleotide (I) (and complements and hybridizable polynucleotides) comprising a contiguous nucleotide sequence coding for a human antibody with factor VIII specificity which has breasness of inhibitory antibodies directed against factor VIII. The polypeptides of the invention and the antibodies generated from them are useful in compositions for neutralizing factor VIII inhibiting antibodies in hemophilia A patients. This sequence represents the human of the invention
                                                                                                                                                                                                                                                                                                               2000-053102/04
